**Internet address: <http://www.incb.org/>**

in accordance with the

**Single Convention on Narcotic Drugs of 1961,\*\* and the  
Protocol of 25 March 1972 amending the Single Convention on Narcotic Drugs of 1961**

---

\*On 2 March 1968, this organ took over the functions of the Permanent Central Narcotics Board and the Drug supervisory Body, retaining the same secretariat and offices.

\*\*Subsequently referred to as "1961 Convention".

## PURPOSE

---

This document contains the current list of narcotic drugs under international control and additional information to assist governments in filling in the questionnaires of the International Narcotics Control Board related to narcotic drugs, namely, form A, form B and form C. It is divided into four parts:

- Part 1** gives a list of narcotic drugs under international control; it is subdivided into three sections: the first section listing those drugs included in Schedule I of the Single Convention on Narcotic Drugs of 1961 and/or Group I of the 1931 Convention, the second section listing those drugs in Schedule II of the 1961 Convention and/or Group II of the 1931 Convention and the third section listing those drugs in Schedule IV of the 1961 Convention and/or Group II of the 1931 Convention. The names and descriptions used are those given in the 1961 Convention or in the official notifications of the Secretary-General of the United Nations. **International non-proprietary names recommended by the World Health Organization are printed in bold type;** in many cases the chemical formula is given to facilitate identification.
- Part 2** lists the preparations of narcotic drugs exempted from some provisions and included in Schedule III of the 1961 Convention.
- Part 3** lists in alphabetical order the names given to the narcotic drugs other than the names listed in part 1, and other designations (mainly trade names) of preparations containing narcotic drugs.

**The frequent introduction by the pharmaceutical industry of new preparations of narcotic drugs under international control, and the withdrawal of old ones, makes a regular updating of the present list necessary for the effectiveness of controls. In pursuit of this objective, the International Narcotics Control Board has now established a database containing a list of such preparations. Governments are kindly requested to provide the International Narcotics Control Board with any additions, deletions or other amendments concerning the present list.**

- Part 4** contains tables showing the pure drug content of isomers, esters, ethers and salts of narcotic drugs listed in the Schedules as well as the equivalents, in terms of the pure drug, of certain extracts and tinctures.

For further information on the names and the chemical and structural formulas of the drugs, see the *Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control* (ST/NAR/1).

## NAMES AND TRADE NAMES OF KNOWN PREPARATIONS OF NARCOTIC DRUGS LISTED IN THE SCHEDULES OF THE 1961 CONVENTION

This part contains a list in alphabetical order of names given to the narcotic drugs under international control and their known preparations in addition to the names listed in Schedules I and II of the 1961 Convention or Groups of the 1931 Convention. Synonyms and isomers are cross-referenced to the names of the narcotic drugs listed in part 1 of this document, which also includes other descriptions or their chemical names.

Other names (mainly trade names) apply sometimes to pure drugs and sometimes to salts or to preparations; in such cases, reference is made to the names given in part 1. The list of trade names is not exhaustive, and the absence of the name of a preparation containing a narcotic drug does not necessarily mean that this preparation is not under international control. It is possible that the same designation may be used for different drugs or preparations in different countries; therefore, in cases where there is ambiguity, it is recommended that the name of the substance in question should always be checked against the chemical designation or formula.

For further information on the names and the chemical and structural formula of the drugs, see *Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control (ST/NAR/1)*.

**Table 2**

*Equivalents, in terms of the pure drug, of extracts and tinctures*

***Cannabis***

One kilogram of tincture is equivalent to about 100 grams of cannabis  
One kilogram of extract is equivalent to about 7 kilograms of cannabis

***Coca leaf\****

One kilogram of tincture of coca leaf containing 0.1 per cent of cocaine, i.e. 1 gram of cocaine, should be considered to be equivalent to 200 grams of coca leaf

One kilogram of fluid extract of coca leaf containing 0.5 per cent of cocaine, i.e. 5 grams of cocaine, is equivalent to 1 kilogram of coca leaf

***Opium\*\****

One kilogram of tincture is equivalent to 100 grams of opium  
One kilogram of extract is equivalent to 2 kilograms of opium

\*For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, coca leaf preparations containing more than 0.1 per cent of cocaine and made direct from coca leaf should be considered to be coca leaf (preparations).

\*\*For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, all preparations made direct from opium are considered to be opium (preparations). If the preparations are not made direct from opium itself but are obtained by a mixture of opium alkaloids (as is the case, for example, with pantopon, omnopon and papaveretum) they should be considered as morphine (preparations).
